WORK EXPERIENCE

Analyst I Software Engineer

DXC Technologies | Jan 2021 – Present | Bangalore, India

Client: Pan America Limited Corporation (U.S. Insurance Company)

- Enhanced and supported LIFECOMM-based life insurance systems, building strong domain knowledge in policy administration and claims.
- Developed and maintained batch and online mainframe processes using COBOL, JCL, Assembler, and Easytrieve.
- Delivered L2/L3 production support for high-availability insurance systems across critical processing cycles.
- Analyzed and resolved system abends during critical production cycles, minimizing downtime.
- Debugged and enhanced legacy code, ensuring system integrity and reliability.
- Collaborated with cross-functional QA, business, and operations teams to consistently meet SLAs.
- Leading a code conversion initiative (past ~1 year) to migrate the database's Easytrieve programs to COBOL, converting 200+ programs so far with the help of an AI copilot.

EDUCATION

B.Tech in Electronics and Telecommunication

Institute of Technical Education and Research (ITER), Bhubaneswar
Aug 2016 – Aug 2020 | Bhubaneswar, Odisha, India

Higher Secondary (12th), Science Stream

Kendriya Vidyalaya
May 2016 | Bhubaneswar, Odisha, India

SKILLS

- COBOL • JCL • Assembler
- Easytrieve • REXX (learning)
- IBM z/OS Platform
- LIFECOMM • VSAM
- Abend-AID • File-AID
- SQL • DB2 (learning)
- React • JavaScript • Java

PERSONAL PROJECTS
